Don't Forget

THE HB SIGN OF EXCELLENCE

Henderson Bros., Winnipeg

Printing and Bookbinding

MOST successful men appear successful. You may never see the man himself. It is his letter-head, his envelope, his business card, his circular, or his catalogue. We size him up by that. You would not say a man was successful if he sent you a business head on wrapping paper.

The man who has made a success of business leaves the things he does not know anything about to those who are competent. John Wanamaker says that his business success has been attained by knowing where to get men who could do well what he cannot do passably.

Putting work in the hands of people who will do it in the right way; this is the first stepping-stone to a successful man's success.

PUTTING brains into your printed matter is just as essential as to put brains into the management of your business. Too often the demands of the latter are such that you can give but little time to the former. Furthermore the production of a high-grade catalogue is a specialty and you cannot be expected to master the details of the business. It is, therefore, necessary in order to secure the kind of advertising matter that attracts attention and sells goods to summon to your aid a printer who "puts brains" into his work. As you have cuts to make, and designing of a cover or title, or running head, you do not want to be dealing with two or three different concerns, because when their product comes together in the book it will be one chance in a thousand if there is harmony in size, conception, etc. The complete builder of catalogues is the one best equipped to serve you, and it is just as essential for you to select a firm of standing and reliability whom you know to be equipped to serve you as it is to select a reliable builder of a machine tool.

WEATHER REPORT: Rain, followed by Clearing Weather and Sunshine

FROM A STUDY IN EXPRESSION

People have learned a whole lot about printing and good taste and art. As they have learned more they require more. The people are yearly more appreciative of the artistic and of the appearance of things. There are more men in business now than ever before, but there are fewer than ever who do not see the force of reason in attractive, interesting and convincing printed matter.
